

Prompt for Generating KoboToolbox-Compatible Questions:

Prompt:

I am designing a **Public Awareness Survey** titled “**Understanding Public Perception of the Sokoto State Bureau of Statistics (SBS)**”. The target audience is a mix of everyday residents, traders, students, civil servants, and community leaders in Sokoto State.

I want to generate a comprehensive set of questions that reflect real-world survey practices.

Please generate a list of at least **40 to 50 survey questions** spread across **logical thematic sections** such as:

1. **Consent & Introduction**
2. **Demographic Profile**
3. **General Awareness of SBS**
4. **Trust and Use of SBS Data**
5. **Engagement with SBS (Events, Platforms, Services)**
6. **Access to Technology & Channels**
7. **Feedback, Suggestions, and Perception**
8. **Knowledge Check: SBS Facts & Statistics**

For each question:

- Clearly specify the **question type** (text, select_one, select_multiple, integer, etc.)
- Include any **validation or constraint** if applicable
- Add **skip logic or relevant conditions** when applicable
- Group repeat questions (e.g., for household members)
- Include at least **one matrix question, ranking question, acknowledgement.**
- Ensure there is **at least one GPS question**
- Add **calculated fields** where it makes sense (e.g., age from birth year, household size from repeated group count)
- Include a **thank you message** or confirmation screen at the end

The tone of the questions should be respectful, inclusive, and understandable by respondents with varying literacy levels.
